chrism@wellintellicated.com | cmoncuso@gmail.com | +1 623 226 5295 | +1 732 768 9059 | US Citizen born in Manhattan, NYC area (Summit, NJ)
Clean criminal history | No contractual restrictions | Never received any source of business funding | Never served in, nor worked for, any govt or military

Experienced project manager and developer, with a foundation in finance managing company budgets, having graduated from an international fast-track program at Johnson & Johnson, the FLDP (Finance Leadership Development Program), through which I obtained a CMA credential in controlling funding and financial interpretation of company performance and strategy. CEO experience of telehealth web app companies with successful development and launches of Android and Apple App Store apps that included the whole range of product development and economizing, from concept and R&D to branding and hiring, with hopes of an IPO to create jobs in high-demand areas of expertise.

EDUCATION

Kelley School of Business, Indiana University Bloomington

Completion Date: 2011

- **Two Bachelor's of Science degree majors completed:**
 - **1. Finance 2. Business Economics & Public Policy – Economic Consulting**
- Lab-class assistant (unpaid) helping implement teachings in advanced spreadsheets and database software classes
- Founder and President of the Corporate Strategy Club, a student organization that was awarded as best up-and-coming club
- Graduated as a member of the Kelley Undergraduate Investment Banking Network (Seminar)
- Studied international finance and international economics in Spain through the IES study-abroad program that allowed me to attend classes with Spanish students

Arizona State University, Online Engineering School, Part-Time Student

Ongoing

Registered as an online student with a declared major of Electrical Engineering, pursuing additional majors and minors in the areas of biology and chemistry, satisfying requirements for admittance into graduate-level programs in the sciences. I intend on being a life-long student, studying online as my work schedule permits.

Total Undergraduate Cumulative GPA: > 3.7 / 4.0

Total College Credits Earned: > 175

Middletown South High School diploma co-op program: Obtained a high school diploma as an invitational guest into a co-op program at a foreign high school, permitting me to work rather than attend senior year. I qualified for this option, or to start college early, upon placing in the top percentiles in state-wide standardized tests, which had already placed me into upper-classmen high school classes where I was one of, if not, the only student from my grade class

Work Out World (high school co-op and post-diploma): Front Desk Rep while attending high school and promoted to Sales Representative before becoming a Certified Personal Trainer through NASM and WITS, which included a nutrition component, working with various repeat clients on-site at a gym chain in the United States

Merrill Lynch – Internship: Supported the Vice President of Wealth Management with procuring clients and ad hoc tasks

Supplemental Science, Tech, and Coding Classes Completed:

Class	Class Code	Grade	Location
Object Oriented Software Programming in Handwritten Java	CSCI-C 212	A	IU Bloomington
Intro to Programming in Python	CSCI-A 201	A+	IU Bloomington
Finite Mathematics	MATH-M 118	A	IU Bloomington
Analytical Geometry and Calculus	MATH 2200	A	University of Georgia
The Computer in Business (spreadsheet software)	BUS-K 201	A+	IU Bloomington
Statistical Analysis of Business and Economics	ECON-E 370	A+	IU Bloomington
Technology (spreadsheet and database software)	BUS-X 201	A	IU Bloomington
General Chemistry II (included electrochemistry lab)	CHM 116	A-	Arizona State University

PROFESSIONAL EXPERIENCE

Johnson & Johnson Finance Leadership Development Program (2011-2013)

- The Johnson & Johnson "FLDP" was a two-year leadership development program that recruited about 100 people, many having already worked for Johnson & Johnson as paid interns and employees, to complete two one-year full-time employment rotations in various sectors and in various areas of corporate finance to learn how to become future leaders of the large international publicly-traded company.
- I was hired as the first overall draft selection by Ethicon, the first-ever Johnson & Johnson company, with a **compensation package that included ~\$60,000 USD salary + multiplied overtime pay of uncapped hours worked beyond 40/week + sign-on bonus + year-end bonus + relocation package that included cash + a corporate card for expenses + guaranteed automatic promotions up through six months after the program ends to ~\$80,000 USD.**
- During the program, I achieved a CMA which is a certification in budgeting and financial analysis that was paid for by J&J and incentivized with a bonus upon completion, and was one of select FLDP graduates to have supervising responsibilities immediately after the program ended. I decided to leave the company due to location issues, and swapped positions with someone at McNeil rather than return to Mentor/Ethicon so I could interview for positions in larger cities, such as NYC and Miami. After alleged confusion of my identity, presumably with the person I swapped positions with, I received a letter of job abandonment while at my mother's house in North New Jersey interviewing for a job in New York City while using my available accumulated Paid Time Off days. Since a private investigator was used to stalk me and track me down at my mother's house with irrational allegations that I was a "mole" and accusations of being interested in stealing the company's laptop, which we were allowed to carry with us to work from home, I chose to not take my job back as offered.

Johnson & Johnson – Ethicon / Mentor Worldwide

Santa Barbara, CA

FLDP Finance Analyst – Sales & Marketing

2011 – 2012

- Responsible for managing the Meetings and Conventions budget, working directly with company leadership in the marketing department as the finance business partner
- Sales and Marketing FLDP – Supported the CFO directly with adhoc requests, partnered with the head of Sales, and partnered with various stakeholders to understand company performance and properly control budgeting and sales initiatives
- Assisted with the integration of Mentor into Ethicon and with the divestiture of a business previously owned by Mentor

Johnson & Johnson – Janssen Pharmaceuticals

Horsham, PA

FLDP Finance Analyst – FP&A, Total OPEX

2012 – 2013

- Partnered with every area of the J&J pharmaceutical business, including tax, to gather total company operating expenses (OPEX) and assemble results decks for reviews with the CFO, which I attended on occasion
- Created contribution statements, which gathered every pharmaceutical product, including still in development, and showed how much financial contribution is being dedicated to each product and in each phase of the US pharmaceutical life cycle, from R&D to being in the generic competition phase

Johnson & Johnson – McNeil

Ft. Washington, PA

FLDP Analyst / Senior Financial Analyst / Finance Supervisor

2013 – 2013

- Analyzed OTC (over-the-counter) performance from a supply chain and operations perspective
- Prepared supply chain results decks and attended leadership reviews that included the CFO and head of all Operations
- Shared supervisor responsibilities with a full-time co-op, whom I was permitted to bring with me to attend leadership meetings, take notes, and manage the more secretarial aspects such as organization and presentation of slides
- After alleged confusion of my identity, presumably with the person I swapped positions with, I received a letter of job abandonment while at my mother's house in North New Jersey interviewing for a job in New York City while using my available accumulated Paid Time Off days. Since a private investigator was used to stalk me and track me down at my mother's house with irrational allegations that I was a "mole" and accusations of being interested in stealing the company's laptop, which we were allowed to carry with us to work from home, I chose to not take my job back as offered and relocated to Miami, FL

Various Temp Employments (<1 year in length)

Miami Area / New York City Area

Finance Employee/Contractor

2014 – 2017

- Companies I worked at through temporary independent contractor agreements include brand names such as Bayer, Grunenthal Latin America, and various more smaller-sized less-known companies. All consulting contracts were through American companies, such as Robert Half.
- Hired as a temporary Independent Contractor in capacities including financial management support, Excel modeling, sales management support, strategic sourcing.
- Completed a full-time employment for exactly one year, from April 20, 2015 until April 19, 2016, at a publicly traded company that was recently announced to be getting acquired, and my job involved supporting the sales teams, marketing directors, and being lead finance in analyzing sales synergies in the merging of physical sites from a previous acquisition to analyze market competitiveness while the FTC was determining whether the acquisition would be approved. I found an indisputable technical malfunction in the sales synergy spreadsheets model, which significantly changed market competitiveness results communicated to the general public as one of the company's key strategic priorities, with my findings changing the results to show a duopoly environment, and the acquisition was denied by the FTC shortly after and my job was eliminated.
- **Upon concluding the above-mentioned full-time one-year employment, I was offered an independent contractor agreement with Kaiser Permanente in California, but the contract was terminated during the group onboarding before the job started without any tardiness, absences, errors, misconduct, nor any reason communicated. I was then injured in Los Angeles as a result of a theft of my phone that required surgery and a very prolonged recovery, as one of the wounds reached my spinal area and required warmth after.**

2017 Started Physical Disability Period

Disabled and received California State Disability Insurance after suffering multiple knife wounds resulting from a theft of my phone while on vacation visiting Los Angeles for the first time for my birthday. One of the knife wounds hit my spinal area and resulted in surgery and a prolonged recovery requiring avoidance of cold temperatures. I attempted to work during the approved disability period but couldn't and a temp contract as a finance manager ended where working from home was not an option.

Bain Capital / Innocor Inc.

New York City Area

Commercial Finance Manager – Contract

2018 – 2018

- Responsible for managing and reporting sales results for the commercial sales side of the business, using Microsoft Excel, Microsoft Access with integration of macros and SQL queries
- Responsible for managing the financial results of the sales team, analyzing performance, pay, and helping with the cutting of checks

Time Star Ventures Inc. / Self

Remote

Project Manager / Lead Developer / CEO

2011 – 2025

- Responsible for the development of a proprietary ledger and budgeting utility offered through a web app, permitting four levels of hierarchies in submitting budgets and cash flows into an insert-only BI-type system, and allowing flexible analyses, including single day variances, of budget vs actual results which allows automatically analyzing and carving out recurring expenses on a per-day, per-week, per-month, and annual basis
- Hired, negotiated pay, and formulated individual employment contracts with doctors, nutritionists, sales representatives, and other types of service experts. Worked with digital design experts to come up with properly branded design work that fits appropriate value themes. Hired independent contractor experts in areas of iOS and Google Play Android app development to assist with adding enhancements to already-developed mobile apps.
- Led the development and launch of Ready Nutritionist, Onwell Clinic, and other brands, being responsible for all areas of business development, talent contracting, and operation, built in order to have the same dynamic feel of JavaScript sites without the risk and potential lack of reliability of script tags, with JavaScript being offered as optional only, isolated and excluded by default yet can be activated by the user clicking the option to enable the JavaScript version of the page. With prioritization of reliability, the decision was to not use any 3rd party libraries, JavaScript frameworks, templates, nor any other form of external code, including Google and popular formatting utilities, and with no links to any external sources aside from integration with a videoconferencing company and payment APIs, such as Stripe, which resulted in acquiring expertise at a sufficient level in custom HTML/CSS design, proprietary logic in PHP, database integration and management using insert-only databases and size-reducing databases concurrently

Coder, Artificial Intelligence

- Coder providing support for outputs of AI prompts, and providing coding services to clients of the parent company with focus areas including: web development logic and design with expertise in PHP, SQL, HTML, and CSS, while providing support in projects that involve additional technologies, including design and logic, such as TypeScript, React, Python, and more.
- While in Brazil, after achieving an approval by Apple for an App Store app that involved IAP integration, cURL requests, and App Store Server Notifications with database integration for cross-platform login management, I was given an opportunity to apply to the LATAM Coders Program, which involved logic assessments, coding tests, language tests, and live interviews.

SKILLS AND IDENTITY

CMA: Achieved a CMA through IMA while in the Johnson & Johnson Finance Leadership Development Program

Programming languages: PHP, SQL, HTML, CSS, Python, Java, JavaScript, Visual Basic, and additional languages and coding technologies

Computer software and servers: LINUX experience creating web servers for websites using NGINX and APACHE with knowledge of using conf files to enable multiple domains with SSL installation, https redirects and servernames, password protection, error page handlings, and workload capacity increases, with knowledge of installation and utilization of packages such as web servers, PHP, MySQL/MariaDB/PostGre, PHPMailer, and iptables

Languages: Portuguese (conversational capability), Spanish (conversational capability), Italian (usually understand the communicable sufficiency), Chinese (very basic ability to participate in society), English (native)

Additional Skills: I own a single-member LLC with the sole purpose of shielding liability from business activities and websites / web apps I built 100% myself, which are not generating income as of April 2025, and will be treated as a side job / hobby in addition to my career, as were other side endeavors, such as nutrition credentials, bouncer at a night club on weekends, sales jobs, Uber driving, insurance and real estate licenses, part-time teaching gigs, etc.

Identity, Background, and Clarification of Employment Gap from Physical Injury Disability: Proof of identity, including birth certificates, passport, and family lineage birth certificates can be found at [linkedin.com/in/chris-undisclosed](https://www.linkedin.com/in/chris-undisclosed). My birthname in the US is Christian Ronnie. I legally submitted a new legal name, Christian Moncuso, that was already approved in the US courts. Italian dual citizenship rights eligibility through family lineage was confirmed in person at the government office in Italy, where I was able to conduct a meeting in Italian using my knowledge of Latin languages to confirm my Italian documents of surname Mancuso. Additionally included are supporting documents such as proof of a physical disability, including hospital records and a victim's compensation document to receive reimbursements from medical expenses, with the injury resulting from a theft of my phone by what was described as an armed gang from El Salvador, which occurred while visiting Los Angeles, USA for my first time to celebrate my birthday. The recovery was prolonged from one of the injuries reaching my spinal area, and a decision was to keep warm and work part-time remote in lower-expense areas of the world.
